

Harshit Negi

Bug Bounty Hunter | Penetration Tester | VAPT Analyst

+91-9870894094 | harshithnegi@gmail.com | [linkedin.com/in/harshithnegi](https://www.linkedin.com/in/harshithnegi) | github.com/harshithnegi | harshitnegi.rf.gd

Professional Summary

Results-driven Penetration Tester and VAPT Analyst ranked in the **Top 8% globally on TryHackMe**, with 50+ cybersecurity labs completed and 35+ vulnerabilities identified and responsibly disclosed. Experienced in web and network penetration testing including reconnaissance, exploitation, privilege escalation, and professional VAPT reporting. Skilled in Burp Suite, Metasploit, Nmap, Wireshark, and OWASP ZAP. Active bug bounty hunter on HackerOne and Bugcrowd.

Key Achievements

- Top 8% Global Rank on TryHackMe | 35+ Vulnerabilities Reported | 50+ Labs & CTFs Completed
- 2 Cybersecurity Internships | Published VAPT Reports | Active on HackerOne & Bugcrowd

Professional Experience

Cybersecurity Intern

Codec Technologies Pvt. Ltd

Sep 2025 – Oct 2025

Black-Box & Grey-Box Pentesting

- Identified 12 vulnerabilities (SQLi, XSS, Session Hijacking, Auth Bypass) via black-box & grey-box web app pentesting using Burp Suite and Metasploit with PoC demonstrations.
- Executed full-cycle VAPT lifecycle — reconnaissance, enumeration, exploitation, privilege escalation, and post-exploitation — across web and internal network environments.
- Delivered structured VAPT reports with CVSS severity ratings, risk assessment, and remediation recommendations.

Cybersecurity Analyst Intern

Oasis Infobyte

Mar 2025 – Apr 2025

Vulnerability Assessment & Reporting

- Identified and triaged 15+ vulnerabilities through automated and manual assessments using OWASP ZAP and Nikto across multiple web environments.
- Validated privilege escalation and lateral movement scenarios to assess security control effectiveness in simulated environments.
- Reported security findings to stakeholders, improving vulnerability visibility and accelerating remediation pipelines.

Technical Skills

- **Penetration Testing & VAPT:** Web Application Pentesting, Network Pentesting, Black-Box & Grey-Box Testing, Reconnaissance, Exploitation, Privilege Escalation, Post-Exploitation, Red Teaming, Bug Bounty Hunting
- **Vulnerabilities & Tools:** SQL Injection, XSS, IDOR, CSRF, Authentication Bypass, Session Hijacking, OWASP Top 10 | Burp Suite, Metasploit, Nmap, OWASP ZAP, SQLMap, Nikto, BloodHound, Impacket, Wireshark
- **Platforms, Languages & Reporting:** Kali Linux, Windows Server, Active Directory, AWS, Docker | Python, Bash | CVSS Scoring, NIST CSF, VAPT Reporting, Remediation Documentation

Notable Projects

Web Application Penetration Testing — Personal Lab

2025 – 2026

- Performed VAPT on DVWA, WebGoat, and HackTheBox targets; identified SQLi, XSS, IDOR, and CSRF vulnerabilities.
- Used Burp Suite Proxy and Repeater to manipulate HTTP requests and demonstrate parameter tampering attacks.
- Developed Python scripts to automate SQL Injection payload testing and brute-force authentication checks.

Network Penetration Testing Lab — TryHackMe / HackTheBox

2025 – 2026

- Performed network reconnaissance and exploitation on 20+ lab machines using Nmap and Metasploit.
- Practiced Active Directory enumeration using BloodHound and Impacket in simulated enterprise environments.

Bug Bounty Research — HackerOne & Bugcrowd

Ongoing

- Actively hunting vulnerabilities in public programs using OWASP Top 10 methodologies with responsible disclosure reports.

Certifications

- | | |
|---|-------------------|
| • Jr. Penetration Tester Learning Path — TryHackMe | 2026 |
| • Windows Penetration Testing Essentials — EC-Council | 2026 |
| • Cyber Security Fundamentals — Internshala | 2026 |
| • Certified Ethical Hacker (CEH) — EC-Council | Expected Aug 2026 |

Education

Bachelor of Technology — Computer Science & Engineering

2022 – 2026

Birla Institute of Applied Sciences
